***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach an electrical rotating machine a rotor and a stator where the rotor and/or the stator has a bundle of laminations positioned on a hub or housing respectively, with a non-rotatable connection between the hub/housing and the bundle of lamination by a form locking contact by plastic deformation. The bundle of laminations having a profiled contact surface for the hub/housing with form locking contact being achieved by a electromagnetic forming of the hub/housing at certain areas. The rotor having a bundle of laminations with longitudinal grooves with a contact surface for the rotor hub has a wave profile and a surface enlargening wave crest is radially aligned with each longitudinal groove.

The Applicant's arguments regarding the drawings of 3/28/03 and 12/18/02 are persuasive. The drawing changes are approved by the examiner.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
